

Kalundborg, Denmark, June 23, 2016

Cestaro Rossi was part of our 2016 TurnAround at Statoil Refining Denmark, where they performed the job of extrating, cleaning and reassembling approximately 150 Shell and Tube Heat exchangers. The job was performed over a 5 week period in close coordination with Statoil and a number of other companies and working under a very tight.

Cestaro Rossi performed the job to our full satisfaction, and meet the goals in respect to HSE (0 incidents), time schedule and quality (no damage to the equipment and zero leaks during start-up).

The people from Cestaro Rossi was well prepared for the job and highly qualified, both mechanics and administration. They were working safely and efficiently, and showed the correct mindset in order for Statoil to achieve the best possible result.

We can only recommend Cestaro Rossi as a serious supplier of these services.

Claus S Koch

TurnAround Manager, Statoil Refining Denmark.
